Project Highlights

4,269 SF CONTEMPORARY RANCH HOME

This is a wonderful transformation of a mid-century modern home. The bones of the original home were good, including abundant square footage and large floor to ceiling windows in the living and dining areas that made strong visual connections with the beautiful and sprawling backyard. The clients' goals were to upgrade systems and modernize finishes in the home originally build in 1955.

The remodel opened up the kitchen to the dining and living rooms creating one larger space. The bedroom and closets were converted into a master bed/bath suite. New French white oak floors and plaster walls, custom-made windows and doors, and an open floor plan made the space light and airy with a feel of casual elegance. The new master bedroom and bath provide space and privacy separate from the children's wing. The remodeled kitchen, with its simplistic, clean lines and oversized, asymmetrical windows, is classic mid-century modern.
