HILLTOP RIVIERA RETREAT

Complete Remodel plus Outdoor Spaces

ALLEN
CONSTRUCTION

BUILDALLEN.COM | LICENSE #503300

"The Allen Construction team is extremely dedicated to delivering a high-quality product. Our renovation was fairly complicated, and we were very discerning about the finish level and details. There was no detail too small for their team to focus on and get right, and the quality of their workmanship really shows."

- BRADY T., Client

Project Highlights

3,546 SF. 5 Bedroom, 4 Bath Home

This beautiful Riviera home was built in 1948 and was completely remodeled and reconfigured to flow with new outdoor spaces. The expansive, unobstructed views were enhanced by replacing windows and adding custom French Combo doors in the dining room to create a seamless flow to a new terrace for entertaining. Views upstairs were enhanced with a new deck that was added off the primary suite.

Inside, new rustic reclaimed beams were added to the main living areas and new oak flooring was added to match the existing floors that were refinished in the rest of the home. In addition, new integral thin wall plaster with a smooth finish was applied throughout.

The kitchen was upgraded and reconfigured to open the space to the dining room and make it more functional. Other improvements include the addition of a new powder room, completely remodeled bathrooms, a new flagstone entry staircase, and new paint on the interior and exterior.
