"We are so grateful to our Allen Team for their guidance and expertise throughout the rebuilding of our home. From the large scope to the minor details, our Team was professional, knowledgeable and supportive. Our Team has been a pleasure to work with, and we are grateful for their part in helping our family move back home!"

- Tracy D., Client

Project Highlights

3,500 SF TWO STORY RESIDENCE
4 BEDROOM, 3.5 BATH

When this young family lost their home in the 2017 Thomas Fire, Allen Construction worked alongside architect, Mica Beving to rebuild. The lot, while enjoying a beautiful view, is at an acute angle on a narrow sloping lane. It was far from a standard rebuild, as it was completely custom and required extensive engineering. The new 3,500 square foot, two-story, single-family residence includes four bedrooms and 3.5 baths with plenty of space for the family and entertaining.

Beautiful Spanish tile details are present in almost every room of the home creating a unifying theme and warm atmosphere. Wood beamed ceilings converge between the living room, dining room, and kitchen to create an open great room. Arched windows and large sliding doors frame the amazing views of the ocean. A fire pit and outdoor kitchen on the lower level can be accessed from the family room or by a beautiful outdoor staircase leading from the great room above.
