Project Highlights

5,000 SF SPANISH COLONIAL

This 5,000 sq ft whole house renovation in Santa Barbara's upscale Hope Ranch enclave includes a second story master suite remodel/addition, a kids' wing, a rec room remodel, a full kitchen remodel, all new doors and windows, and a new pool and surrounding deck. A covered patio with deck above allows the owners to soak in the property's stunning ocean and mountain vistas. Special details of this traditional Spanish style home include high open beam ceilings, colorful Spanish accent tiles on the stairways, dark hardwood flooring in some areas and terracotta tile in others, and custom wrought iron hardware.

The family, who relocated from the Bay Area, enjoyed close contact with our production team throughout the remodel process, thanks to our web-based construction project management software, daily photos and time lapse videos of key components of their project's progress.
