MONTECITO CRAFTSMAN RESTORATION

Stunning Millwork Throughout

ALLEN
CONSTRUCTION

BUILDALLEN.COM | LICENSE #503300

"One of the best decisions I made was choosing Allen Construction to partner with for the rebuild. This was not a design and build project. There was a complexity of obstacles so far beyond the scope of a construction company that I knew I needed a company with a deep reputation in this town, strong local connections, and a talented labor pool. I am so grateful for all of those at Allen Construction. And now, two years after the debris flow, sitting in my home, looking at the tedious perfection of the fine craftsmen of Allen Construction, I can tell you that I am a victor that managed to find a small bit of blessing from this tragedy. Thank you to everyone at Allen Construction."

- Steve & Vicki, Homeowners

Project Highlights

MONTECITO MUDFLOW RESTORATION

This family home was in the path of the Montecito Mudflow in 2018. The interior of the home was damaged throughout from mud that accumulated in the crawlspace under the home. Every room of the home was renovated, and the homeowners took this opportunity to make many upgrades to the finishes and improve the layout of the kitchen.

Meticulous millwork details were incorporated throughout the house, but lighter finishes were used to create a more open feel. The outdoor kitchen was upgraded and reconfigured to take advantage of the original outdoor stone fireplace.
