MONTECITO RANCH REMODEL

Interior and Exterior Renovation

ALLEN
CONSTRUCTION

BUILDALLEN.COM | LICENSE #503300

"We couldn't be happier with Allen Construction. They are exceptionally nice people, and very professional. They not only did a great job rebuilding our house after a major mudslide, but they expertly navigated the complicated permitting and inspection processes. The reconstruction of damaged areas and the remodeling on other parts of the house were seamless." - Roger, Homeowner

Project Highlights

2,100 SF MUDSLIDE REBUILD

This house was in the path of the 2018 Montecito mudslides and suffered extensive damage both inside and out. The footprint of the home was unchanged, but every room in the home needed to be restored and renovated.

This remodel included all new finishes, flooring, windows, and doors. The two fireplaces were finished with stone designed to keep the charm of the cozy home. The exterior was updated with new board and batten siding in the front, new expanded patio area, and a revitalized garden.

The remodel also included an attached guest studio complete with a kitchenette, a beautiful bathroom, and its own garden entrance.
