"I can tell you that I've done many projects, and this is the first cross-county renovation. It has been the most rewarding, easy, and smooth experience that I've ever had. Every person I have come in contact with has been outstanding, from the receptionist to the billing person to the supervisor."

- Howard & Susan S., Clients

Project Highlights

3,664 SF HAMPTON INSPIRED HOME

This whole house remodel transformed a ramshackle 1960's ranch style home into an elegant essence of a Robert Stern home found in the Hamptons. With its grand entry, palladium window, and fabulous ocean and mountain views, you get a subconscious feeling that the house is grander than it is.

A new second story, added to capture the views, was perfectly placed and looks like it has always been there. The upstairs loggia offers sweeping views of the Pacific Ocean. Every element of the home was discussed in detail by the owner, architect, interior designer, and the Allen team to get it just right. One example of this teamwork and attention to detail was bringing the owner's vision of having her kitchen island look like the grand piano she left behind in New Jersey (since there was limited space in this new house for it). The final product is a lightly exaggerated, mirror image of a real grand piano with part of a piano leg supporting the counter.
