"Thanks for being the nicest and most professional people in town to work with. We do very much enjoy working with all of you."

- Peter Becker, Architect

Project Highlights

2,426 SF CONTEMPORARY HOME

The original home on this property was destroyed during the 2008 Tea Fire. In order to meet the clients' restricted rebuilding and design budget, the architect suggested a contemporary style. The design's straight and simple lines make it one of the most cost effective architectural approaches.

Floor-to-ceiling picture windows providing stunning views of Santa Barbara Channel. Beautiful, yet durable, strand-woven bamboo floors and granite counter-tops contribute to the contemporary feel of the space. The finished product is more sophisticated than what anyone imagined the design budget could support.
