Award-Winning Green Build

ALLEN
CONSTRUCTION

BUILDALLEN.COM | LICENSE #503300

"We wanted to build green with a focus on contemporary design. This goal was accomplished working in partnership with [Allen Construction]. Our home exceeds California energy efficiency standards by over 30%. It also was awarded first place in the Santa Barbara Beautiful Awards competition. This was achieved with . . . much of the design details worked out directly with [Allen.] Bravo!"

- Ed and Joan T., Clients

Project Highlights

2,953 SF MID-CENTURY HOME

This whole-house remodel updated and expanded a 1950s contemporary house. In addition to making the home more comfortable and energy-efficient, the remodel added fabulous finishes. Separate living, dining, and kitchen area walls were opened and a new structural beam added to make one grand room with abundant natural light and strong connections to the outside environment. A new bocce court was added on the ocean side of the house to "expand the party" down the yard.
